Description

Teak is an exceptional wood, timeless and refined. Used in emblematic locations such as the bridges of the finest boats or Asian temples, it possesses excellent technical characteristics: stable, resistant, soft to touch, pleasantly fragrant. Indoors, it patinates over time to a golden brown colour; outdoors, it oxidises to a silver-grey tone - this alters none of its properties.

Dining table made from the finest quality natural (non-oiled) solid teak from managed plantations in Indonesia. Polythene gliders. May be complemented by the bench of the same name, which slides between its legs. Suitable for indoor or outdoor use.
